

PROUDLY MADE IN **GEORGIA** 

VITAMIN POWER

A man with a shaved head and tattoos is in a squatting position in a gym, holding a barbell. He is wearing a dark t-shirt with "VITAMIN POWER" on it. The background is a dimly lit gym with various equipment. A can of AAKG Powder is on the floor to his right. The text "VITAMIN POWER" is overlaid in large white letters, with a lightning bolt symbol inside the letter 'O'. The word "VITAMIN" is above "POWER".

SUPPORTING ATHLETES **SINCE 2021**

PRODUCT INTRODUCTION

ABOUT US

Vitamin Power is a Georgian sports nutrition brand created for people who are driven by progress.

From professional athletes and fitness enthusiasts to people simply looking to support a more active lifestyle, our goal is to provide high-quality, functional sports nutrition that fits into everyday life.

Proudly made in Georgia, Vitamin Power develops a growing range of sports nutrition products, including whey and plant-based proteins, mass gainers, creatine formulas, amino acid complexes, and other performance-focused supplements. Our portfolio is designed to support different training goals and nutritional preferences — whether the focus is building muscle, supporting recovery, improving daily protein intake, or maintaining an active lifestyle.

QUALITY AT THE CORE

Quality is one of the foundations of Vitamin Power. We place strong emphasis on ingredient selection, formulation, production standards, and consistency across our product range.

Our products are developed using carefully selected raw materials and functional ingredients chosen according to the purpose of each formula. From classic whey protein and pure creatine monohydrate to advanced multi-ingredient formulas and plant-based alternatives, every product is created with practicality, performance, and ease of use in mind.

Vitamin Power products are proudly manufactured in Georgia, and product quality is supported by laboratory testing. Our commitment is to continuously develop products that meet the expectations of modern athletes and consumers who care about what they put into their bodies.

REACH YOUR GOAL!

WIDE
SELECTION

NUTRITION FOR DIFFERENT GOALS

We believe sports nutrition should not be limited to one type of athlete. That is why the Vitamin Power range includes products for different lifestyles, training levels, and nutritional needs. Our protein portfolio includes both whey-based and plant-based options, while our performance category features creatine and amino acid formulas designed for active individuals.

We also offer mass gainers created for consumers with increased calorie and macronutrient requirements, alongside specialized formulas that combine proteins, carbohydrates, amino acids, creatine, and other carefully selected ingredients.

This diverse approach allows Vitamin Power to support everyone from beginners taking their first steps into fitness to experienced athletes working toward demanding performance goals.

MADE IN GEORGIA. BUILT FOR PROGRESS.

Vitamin Power represents the growth of locally developed sports nutrition in Georgia.

Being a Georgian brand is an important part of our identity. We aim to combine local production with a modern approach to sports nutrition, creating products that can confidently stand alongside established international brands in terms of presentation, variety, functionality, and ambition.

We continue to expand our portfolio, improve our formulas, and develop new products in response to the changing needs of athletes and active consumers.

For us, progress is not only about lifting more weight, running faster, or achieving a new personal best. It is about consistency — making better choices every day and having the right nutrition to support those choices.

OUR MISSION

Our mission is to make reliable, high-quality sports nutrition more accessible and to help people build stronger habits around training, nutrition, and performance.

We want Vitamin Power to be more than a supplement brand. We want it to become a trusted part of the journey — from the first workout to the next goal, the next challenge, and the next level of performance.

OUR COMMITMENT TO EXCELLENCE

VITAMIN POWER PHARMA GRADE LINE

CREATINE MONOHYDRATE

100% Pure Creatine Powder

PRODUCT OVERVIEW

Vitamin Power Amino 12000 is a comprehensive amino acid formula containing BCAAs, glutamine, beta-alanine, and L-arginine. It is designed to support endurance, workout performance, muscle recovery, and protein synthesis, making it a practical choice for active individuals and athletes.

*Recommended Serving Size: 1 Serving (13g)
take 2 servings for maximum results*

MINIMUM ORDER QUANTITY

200 kg

AVAILABLE IN 3 SIZES

200 g, 300 g, 400g

A pure creatine monohydrate formula designed to support strength, power, performance, and muscle recovery.
